EVALUATION CRITERIA

Because no offeror fully met all areas of the technical criteria of the specification, the government is reserving the right to award a contract to that contractor that best conforms to the specification. Thus, the requirement listed under the "PRODUCT SAMPLES" area of the solicitation is hereby changed. Offerors are no longer required to fully meet and conform to all areas of the specification. Technical evaluations will be conducted using an adjectival rating system. Each offeror will be given a technical adjectival rating of highly favorable, favorable, unfavorable, or highly unfavorable. This change will allow the government to make an award decision to that offeror who best conforms to the specification and is determined to be the best value to the government based on the below criteria.

Technical

Past Performance

Price

The Technical evaluation is more important than Past Performance.

Past Performance and price are of equal importance.
